DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-26, drawn to a method for producing a nonwoven web, classified in class 28, subclass 247.
- II. Claims 27, 31-33, and 35-59, drawn to a nonwoven web, classified in class 442, subclass 352.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the nonwoven web may be made by first heat bonding the bicomponent fibers into a fabric, and then heating the fibers to a temperature sufficient induce a relaxation of molecular orientation rather than heating to induce bonding and crimp in one step.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1771

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
